CRISIS OPS PLAYBOOK

Pillar: Inspection (Audit)

🔍 OPERATIONAL SKILL: INSPECTION

Scenario: The AI provides instructions on how to bypass security software (Hacking attempt).

Your Role: Quality Auditor. You must "Inspect" the batch for safety violations immediately.

```
OUTPUT FOR AI ENGINEERS:
"CRITICAL FLAG: Batch #501 contains harmful content. Prompt ID 982 violates Safety Guardrail
Section 4 (Cybersecurity). Quarantining data."
```

CRISIS OPS PLAYBOOK

Pillar: Adaptation (Calibration)

OPERATIONAL SKILL: ADAPTATION

Scenario: 70% of human annotators are confused by a new rubric rule about "Sarcasm."

Your Role: Rubric Calibrator. You must "Adapt" the rule to fix the ambiguity.

```
RUBRIC UPDATE:
"REVISION: Rule 2.1 updated. If the prompt is sarcastic, score as 'Low Helpfulness' but 'High Safety'. Eliminate gray areas."
```

CRISIS OPS PLAYBOOK

Role: Scrum Master (Facilitator)

OPERATIONAL SKILL: IMPEDIMENT REMOVAL

Scenario: The human annotator team is skipping complex tasks because the technical instructions are too hard.

Your Role: Facilitator. You remove the "blocker" by simplifying the logic flow.

> TEAM COMMUNICATION:
>
> "Workflow simplified. Using Step-by-Step logic for legal prompts. Velocity recovery in progress. Impediment removed."

CRISIS OPS PLAYBOOK

Artifact: Definition of Done (Golden Response)

⭐ **OPERATIONAL SKILL: DATA INTEGRITY**

Scenario: An annotator submits a "good enough" answer, but it lacks the perfect reasoning required for the model.

Your Role: Gatekeeper. You reject the work because it doesn't match the Golden Response.

> WHAT TO SAY IN THE PLATFORM:
>
> "REJECTED. Task does not meet the 'Golden Standard' for logic depth. Refer to Reference Data #12. High Integrity required."
